

- 1) Write a query that produces all pairs of salespeople who are living in the same city. Exclude combinations of salespeople with themselves as well as duplicate rows with the order reversed.

```
W1_84109_Sumit>Select m.Sname,n.Sname,m.City
-> from SALESPEOPLE m,SALESPEOPLE n
-> Where m.City=n.City AND m.Sname<n.Sname;
+-----+-----+-----+
| Sname  | Sname | City  |
+-----+-----+-----+
| Motika | Peel  | London |
+-----+-----+-----+
1 row in set (0.00 sec)

W1_84109_Sumit>
```

- 2) Write a query that produces the names and cities of all customers with the same rating as Hoffman.

```
W1_84109_Sumit>select Cname,City from CUSTOMER where Rating=(select Rating from CUSTOMER where Cnum='2001');
+-----+-----+
| Cname  | City  |
+-----+-----+
| Hoffman | London |
| Clemens | London |
| Pereira | Rome   |
+-----+-----+
3 rows in set (0.01 sec)
```
